

How microneedling works

See what microchannels do, why results are gradual and when active inflammation makes needling inappropriate.

What it means

Microneedling creates controlled micro-injuries with a sterile device. The healing response can support collagen remodelling and make selected scars, texture, pores, fine lines and stretch marks look less noticeable over time.

Important limit

Microneedling is not carried out over active infection, painful inflammatory acne, an active rosacea flare or skin that has not recovered from recent sun exposure or treatment.

How microneedling works

How Idalia may support you

Route	Purpose	Starting point
Face microneedling	A consultation-led face treatment with depth changed by area.	GBP 85
Course of three	A staged course with recovery reviewed before each session.	GBP 225
PRP/PRF route	Own-blood skin-quality support combined with needling where suitable.	From GBP 79

A useful home-care foundation

- Follow product-specific preparation
- Pause unapproved actives
- Use strict sun protection
- Do not pick flaking skin

Pause and seek appropriate review when

- Active infection
- Painful or pus-filled acne
- Poor healing or keloid history
- Recent tanning or sunburn

Remember

This leaflet is general cosmetic education. It does not diagnose a condition, confirm suitability, replace medical advice or act as treatment consent. Individual response and recovery vary.
